BrokerTech Landscape Report

December 2025

Category	Description	Relevance for Broker Tech Executives	Innovation/Growth Implications for Carrier Tech Executives	Top Players (Established & Emerging)
Insurance Marketplaces and Aggregators	Digital platforms aggregating carrier quotes for comparison, lead generation, and policy issuance; includes consumer-facing sites and broker tools.	Empowers brokers with multi-carrier access, speeding up placements and client acquisition; reduces manual carrier outreach.	Boosts carrier visibility and premium volume through broader distribution; drives innovation in API connectivity and data standardization for faster integrations.	Established: Policygenius, The Zebra (auto-focused), EverQuote, Insurify, NerdWallet, Mylo (digital aggregator for multi-line comparisons). Emerging: Annuities Genius (annuity-specific), CoverGo (modular aggregator tech), Semsee (commercial focus).
Quoting and Rating Tools (CPQ)	Automated systems for configuring, pricing, quoting, and binding policies across carriers.	High: Accelerates sales cycles and comparative rating, making brokers more competitive in digital markets.	Drives carrier growth by increasing quote volume and conversion rates; implies innovation in API integrations for real-time pricing.	Established: Bold Penguin, Semsee, EZLynx, Bolt (distribution platform for agents with quoting tools). Emerging: SquareRisk (2025 BTV: marketplace for specialty MGA products), Fenris (2021 BTV: digital quoting automation).
Marketing Automation and Lead Generation	Platforms for email campaigns, content personalization, lead tracking, and prospect nurturing.	Medium-High: Enhances outreach and conversion; automates tailored communications to build pipelines.	Expands carrier reach through broker marketing, leading to higher policy uptake. Growth via data-driven campaigns targeting underserved segments.	Established: MailChimp, Zywave's Broker Briefcase, AgencyBloc. Emerging: Broker Buddha (2020 BTV: smart forms for leads), Layr (2021 BTV: digital marketing for small business insurance).
Customer Relationship Management (CRM)	Tools for managing leads, client interactions, workflows, and analytics in a 360° view.	High: Boosts client retention and cross-selling; integrates with omnichannel communication for personalized service.	Facilitates better alignment with carrier products, improving placement accuracy and premium growth. Innovation through shared CRM data for predictive modeling.	Established: Salesforce for Insurance, Zoho CRM, InsureCRM, Wealthbox (financial advisor focus with insurance integrations), RedTail (advisor CRM for insurance/wealth). Emerging: RiskAdvisor (2025 BTV: streamlines workflows and client engagement), Aureus Analytics (2021 BTV: data analytics for brokers).

BrokerTech Landscape Report

December 2025

Category	Description	Relevance for Broker Tech Executives	Innovation/Growth Implications for Carrier Tech Executives	Top Players (Established & Emerging)
AI and Automation Tools	AI-powered workflows for tasks like data entry, policy verification, and predictive analytics.	High: Automates repetitive tasks, enabling brokers to focus on advisory roles; critical for scaling in AI-driven insurtech.	Accelerates carrier innovation via broker AI insights, improving risk pricing and product development. Growth through reduced operational costs.	Established: Convr, CAPE Analytics. Emerging: FurtherAI (2025 BTV: AI assistants for workflows), Powerbroker AI (2024 BTV: AI for broker operations), Stitch Studio (2025 BTV: AI agents).
Risk Assessment and Analytics	Tools for data aggregation, risk profiling, compliance monitoring, and business intelligence.	High: Provides actionable insights for better client advice and risk mitigation.	Enhances carrier underwriting with broker-shared data, fostering growth in emerging risks like cyber. Implies collaborative innovation ecosystems.	Established: Cytora, Aureus Analytics. Emerging: Sentinel (2024 BTV: risk analytics), Gabriel (2024 BTV: predictive tools), altumAI (2021 BTV: AI risk assessment).
Agent Onboarding and Compliance Platforms	Tools for automating producer contracting, licensing, appointments, background checks, and compliance monitoring across carriers.	High: Speeds up agent onboarding, ensures regulatory compliance, and scales producer networks efficiently; essential for agencies managing multiple carriers.	Reduces carrier administrative burden through streamlined integrations; drives growth by enabling faster distribution partnerships and reducing errors in agent vetting.	Established: SuranceBay (SureLC), Vertafore (Sircon for compliance). Emerging: AgentSync (automated licensing), BindHQ (agency management with onboarding).

BrokerTech Landscape Report

December 2025

Category	Description	Relevance for Broker Tech Executives	Innovation/Growth Implications for Carrier Tech Executives	Top Players (Established & Emerging)
Agency Management Systems (AMS)	Centralized platforms for policy tracking, claims, renewals, client portals, and automation.	High: Streamlines daily operations, reduces errors, and scales brokerages without adding staff. Essential for modernizing legacy systems.	Enables seamless data exchange with carriers, speeding up underwriting and reducing friction in distribution. Growth via expanded broker networks and real-time insights.	Established: Applied Systems, Vertafore, HawkSoft, EZLynx. Emerging: BrokerEdge (from DAMCO), Adaptional (2025 BTV cohort: automated back-office).
Claims Management and Processing	Solutions for tracking, automating, and analyzing claims to improve efficiency and client satisfaction.	High: Reduces manual work, speeds resolutions, and integrates with carrier systems for better outcomes.	Lowers carrier costs through faster processing and fraud detection; innovation in AI for predictive claims to optimize reserves.	Established: Riskonnect, Insurity. Emerging: Aclaimant (2021 BTV: incident reporting and claims), When (2025 BTV: reduces high-cost claims for employers).
Collaboration and Client-Facing Platforms	Tools for team communication, client portals, and self-service features like policy access.	Medium: Improves internal efficiency and client experience in hybrid work environments.	Supports carrier growth by enabling brokers to offer digital self-service, reducing administrative load and increasing loyalty.	Established: Microsoft Teams, Slack, Zwave's Client Cloud. Emerging: Feathery (2024 BTV: forms and portals), LightDoc (2025 BTV: policy comparison portals).

BrokerTech Landscape Report

December 2025

Segment	Brokertech Nuances	Relevance for Broker Tech Executives	Innovation/Growth Implications for Carrier Tech Executives	Top Players (Established & Emerging)
Life/Annuity	Emphasis on illustration tools, suitability analysis, and CRM for financial planning; tech handles complex products like variable annuities with compliance checks. High regulation drives AI for personalization.	High: Enables advisors to model scenarios and close sales faster; critical for client retention in wealth management.	Supports carrier growth via digital submissions and data analytics for product refinement; innovation in embedded life products.	Established: iPipeline, Ebix, FireLight (illustration platforms). Emerging: Annuities Genius, Life.io (engagement tools), Atidot (predictive analytics).
Auto/Home (Personal Lines)	Focus on real-time quoting, telematics integration, and mobile apps; aggregators dominate for quick comparisons. Shorter sales cycles, high volume.	High: Streamlines high-turnover sales; brokers compete with direct writers via digital tools.	Drives premium growth through usage-based insurance; innovation in IoT data for risk pricing.	Established: EZLynx, Policygenius, The Zebra. Emerging: telematics-focused), Gabi (comparison app).
Commercial P&C	Tools for risk assessment, multi-carrier submissions, and customization; handles complex risks like cyber or property. Longer cycles, data-heavy.	High: Automates submissions for efficiency; essential for scaling in niche markets.	Enhances underwriting with broker data; growth via specialized products and partnerships.	Established: Bold Penguin, Semsee, Convr. Emerging: Cytora (AI risk), Appulate (submissions platform).
Group Benefits	Platforms for enrollment, benefits administration, and employee portals; integrates HR tech for compliance and wellness. Employer-focused, seasonal renewals.	High: Simplifies open enrollment and compliance; brokers add value via advisory services.	Fuels growth in voluntary benefits; innovation through data for personalized plans.	Established: Employee Navigator, Benefitfocus, Ease, Nayya, bswift. Emerging: PlanSource, Empyrean (HR integration).
